

INVENTORY FOR WINDOWS

THE TOOL YOU NEED TO MANAGE INVENTORY AND MAXIMIZE PROFITABILITY

Your inventory investment is one of the largest and most important in your business. Knowing whether an item is moving well or slowly is critical to profitability. Without the best inventory tracking system, your ability to respond is limited. Good inventory management ensures that your pegs and bins are filled with the products your customers need today. No business wants the reputation for “never having what I need.”

But carrying too much inventory affects profitability, making it more difficult for you to meet expenses or get that business-expansion loan you need. Any reduction in inventory can have a dramatic impact on your bottom line. If you operate a multi-location business, you understand that inventory overstock at one location can lead to cash management problems and shortages elsewhere.

Activant Eagle® Inventory for Windows provides you with all the necessary tools to help you manage and reduce inventory and increase profits. Online inquiry and management reports allow you to analyze your stock and make the best decisions to get your inventory back on track.

Managing pricing is easy. You can electronically receive price updates from supported suppliers. You can even set up preferred prices for your best customers and promotional prices for limited-time offers.

Information is always right at your fingertips, allowing for quick and simple updates. In addition, Inventory for Windows links to POS and purchasing functions to help you increase customer satisfaction by making it easy to validate orders and estimate delivery dates.

Don't wait any longer to implement Inventory for Windows, the tool that could make an immediate, positive impact on your bottom line.

BENEFITS

- Carry optimal levels of inventory to maximize profitability
- Make sure your most popular in-stock products are always available
- Reward your best customers with quantity-discount or preferred pricing
- Receive supplier price changes electronically, then schedule your own to maintain profit margins
