

ANDERSEN INTERFACE FOR ANDERSEN WINDOWS INTELLIGENT QUOTE

ELIMINATE DOUBLE-POSTING WHEN YOU IMPORT ANDERSEN ORDERS INTO YOUR ACTIVANT EAGLE™ OR ACTIVANT FALCON™ SYSTEM

If you use the Andersen Windows Intelligent Quote (iQ) software, you enjoy the advantages of electronically configuring, quoting and transmitting purchase orders for Andersen products. While third-party software is convenient, the real efficiency is realized when it integrates with your business management solution.

With the Andersen Interface from Activant Solutions Inc.™, you can import your estimates—complete with model numbers, quantities and prices—in just seconds. With just a few clicks of the mouse, you can load all the information from your iQ file into any transaction—POS, estimate and order—preserving any custom prices or decisions.

Do you need to make a quick price change? Simply edit any iQ line item in the Activant system. Do you need to special order one of the quoted items? Simply import the quote as a special order and let your Activant system track it for you.

Because the Andersen Windows iQ system generates the quote and directly imports the details into the Activant system, there is no chance of a keyboarding error or missing line item. And the upload time is just seconds long.

To gain the greatest efficiency from the Andersen iQ system, choose Activant's Andersen Interface to realize the speed and efficiency that comes from integrating third-party software.

BENEFITS

- Eliminate keyboarding errors with direct upload from iQ to Activant
- Post iQ information to any transaction type, including estimates and special orders
- Edit Andersen orders in your Activant system to maintain target profit margins and fulfill customer commitments

An imported Andersen Windows quote complete with item descriptions. (Note: *Activant Eagle* for Windows screen shown.)
