

POINT-OF-SALE FOR WINDOWS

INTUITIVE, WINDOWS-BASED POS APPLICATION IS EASY TO USE, SO YOU CAN SEND CUSTOMERS ON THEIR WAY IN RECORD TIME

Saturday morning and the lines of customers at checkout are three-deep. Having plenty of customers in your store is a good thing, but long lines can be frustrating for customers as well as employees.

Improve your customers' buying experience, move your customers quickly and accurately through the checkout line and increase customer satisfaction with the easy-to-use Windows-based Point-of-Sale software.

The software is Microsoft® Windows®-based, so it's easy to learn, meaning your customers won't have to wait for new clerks to get trained at the register. With QuickFind, the online price book, you virtually eliminate the need for employees to thumb through price books, looking for bulky or hard-to-sticker items. Employees can match on-screen photos with the item a customer has in-hand to ensure accurate pricing. When items are sold correctly at point-of-sale, your inventory counts are more accurate and your profit margins meet your goals.

Activant Eagle® Point-of-Sale for Windows allows you to add special order items at point-of-sale, add catalog items to purchase orders and automatically calculate deposits.*

Now that's service!

BENEFITS

- Quick and accurate customer check out with transaction prompts and bar code scanning
- Offer true customer service through powerful search tools, including extended descriptions
- Accurately price merchandise by matching the product image using the QuickFind online price book
- Add special order items at POS and automatically collect a specified deposit amount to protect your business

KEY BENEFITS OF POINT-OF-SALE FOR WINDOWS
