

BAR CODE SCANNING

POINT-OF-SALE SCANNING FOR INVENTORY AND PRICE MANAGEMENT

Are you ready to improve accuracy and efficiency at the checkout counter? With Activant's Bar Code Scanning solution, you can simply scan items at point-of-sale with confidence that today's price is accurately reflected on the register receipt. In addition, our software allows you to assign multiple bar codes to each SKU, so each sale or return instantly updates your inventory counts, helping you maintain optimal product levels.

Activant's scanning software supports and reads all retail bar codes, virtually eliminating keystroke errors. Price changes are a snap. Imagine the time you'll save by printing a new bin label for each SKU rather than placing a price sticker on each item as prices change. And no more surprises at the register. Print bin labels and ring-up customers at the new price in minutes. Use the UPC ScanStart® tape to get up and running quickly. The tape loads and attaches bar codes to just about every SKU in your inventory, so you don't have to. If the system prompts the clerk that the bar code is not currently on file, simply enter the SKU, processing the sale and linking the UPC and SKU for further purchases. Increase your customers' satisfaction by decreasing the amount of time they spend at point-of-sale with Bar Code Scanning software.

BENEFITS

- UPC ScanStart® tapes get you up and running quickly
- Print new bin labels when prices change to eliminate per-item stickers
- Software reads all retail bar codes so you can enter new SKUs on-the-fly
- Hand-held and omni-directional scanners to meet your business needs

KEY BENEFITS OF BAR CODE SCANNING

Save time with automated price updates

- Eliminate per-item price stickers and move received merchandise from the dock to the shelf quickly with bin pricing
- Enter new SKUs into your system on-the-fly with dynamic loading at point-of-sale
- Scan all retail barcodes (including UPC/EAN/JAN Code 128, Code 39, Code Interleaved 2 of 5, EAN128)
- Update price, print new bin label, and ring up the new or event pricing at POS within minutes

Stock optimal inventory levels based on today's data

- Assign multiple UPCs for any SKU to help you monitor inventory levels
- Review product levels in the Activant Eagle IMU or LOD inventory screens

Review and purge old UPC data easily to free disk space and maintain system efficiency

- Print audit reports to view resident UPC information
- Automatically purge unused UPCs from you system-you determine the time sensitivity

Use the scanner immediately after you upload the UPC ScanStart tape

- Automatically load SKU-to-UPC cross-reference information for various suppliers

Save hours of data entry with the ScanStart tape. Choose sturdy, economical scanners that suit your business needs

- Omni-directional scanners can be adapted to hand-held use for large, bulky items
- Mount the cradle in a convenient, fixed location
- Scan truncated and poorly printed bar codes not easily read by other scanners with a minimum of operator effort
- Large "Can't Miss" scan pattern
- Easy-to-use hand-held design is simple and intuitive, yet powerful enough for almost any scanning situation
