

CATALOG FOR WINDOWS

FIND THE ITEM YOUR CUSTOMER NEEDS, SHOW THEM A PICTURE ON-SCREEN, AND THEN ORDER IT WITH THE PRESS OF A BUTTON

When your customers ask to see a picture of an item they might want to order, do your employees have to rummage through paper catalogs trying to find the item? Do your customers often get impatient and leave?

With Activant's Windows®-based Catalog software, your employees can quickly locate product information, including a picture, and present it to the customer on-screen in an attractive format. In addition to powerful look-up capabilities, sorting and filtering tools help your employees identify items that meet the customer's needs and price range. Once your customer chooses a product to order, your employees simply press a button to automatically add the item to a special order and purchase order using the Windows-based Point-of-Sale software.

The Windows-based Catalog supports all of the features of the character-based catalog and more. Tailor the information in the item list to meet your needs. The "advanced-inventory-add" feature allows you to edit item information as you add it to your inventory file, while the "substitute" and "referral" links ensure you are ordering the right item.

BENEFITS

- Quickly locate catalog items and display them to your customers in an attractive format
- Supplement your employees' product knowledge with extensive item information
- Comprehensive system integration connects you to the catalog and ordering functions in moments

KEY BENEFITS OF CATALOG FOR WINDOWS

Search for the items your customers need and offer similar or next-best products, if necessary

- Search for items by item number, UPC, MFG#, description, manufacturer or fineline
- Drill down to item detail by department, class and fineline
- Fineline search lets you zero in on similar products
- Review substitute and referral information to quickly and easily find an exact replacement or the next-best item for your customer*
- Access the Catalog using Windows-based Point-of-Sale software

Give your customers the details they need to feel confident in your ordering process: price, availability, expected deliver date

- Display today's stock levels:
 - By store
 - Quantity-on-hand, on order, future order quantity and order point information
 - Optionally display "Your Retail" and "Suggested Retail"
 - User codes
- View quantity available at wholesaler's warehouse*
- View item images*
- Vendor notes*

 - Ordering and return policy

- Display costs in coded format*
- Sort and filter item list on multiple criteria, including:
 - Price
 - Fineline
 - Manufacturer
 - Date added to catalog

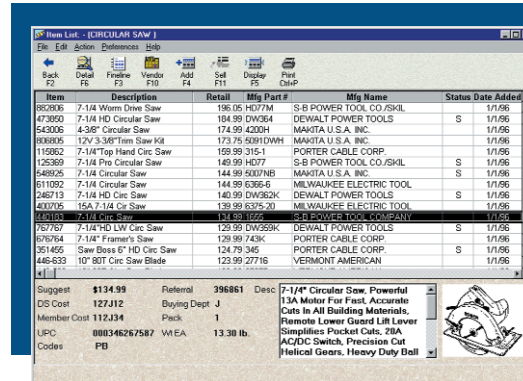

System integration lets you review and choose a Catalog item, then order it through your Eagle system with the touch of a button

- No-hassle ordering helps you serve customers at point-of-sale
- Hot key moves you from POS to Catalog
- Post items quickly from Catalog to POS transactions
- Add non-stocked items to a POS special order

Review inventory levels to set realistic delivery expectations for your customers and maintain accurate inventory file

- Copy information into the inventory file based on default parameters with the Quick-Add feature

*Feature availability varies by wholesaler catalog. See your Activant representative for details.

Use powerful search functions to find the exact item your customers are looking for and even display the image on-screen.

- Edit item information fields prior to adding to inventory with

Full-Add feature. Fields include:
