

# BILL OF MATERIALS FOR WINDOWS

## CREATE STANDARD KITS, THEN ADD-ON CUSTOM COMPONENTS AT POS WITH FLEXIBLE PRICING OPTIONS

Kits have proven to be a quick and easy way to sell complicated items-but what if your customer needs a component not included in the kit? Activant's Bill of Materials software allows you to set up a Bill of Materials (BOM) header and components and then allows you the flexibility to manipulate the components at point-of-sale.

In addition to standard kits (items grouped together to be sold as one unit), Bill of Materials lets you create BOMs with custom line items, nested BOMs and add special instructions for the shop.

Instead of creating dozens of kits for the different types of doors you offer, create one standard BOM for a door, then customize the options at checkout. Choose solid or hollow core door, brass or regular hinges and accessories from drop-down menus.

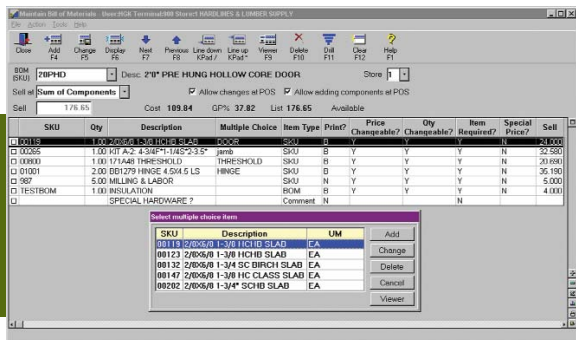

Line items can include inventory items or nested BOMs. Even though your door jamb assembly may have many items, it only shows on the BOM as one item.

Flexible pricing methods allow you to set the price according to different formulas such as set price, cost plus a percentage, mark-up by a certain amount, sum of the components of the BOM or discount off the total price.

If you sell items with multiple components that change with each transaction, then *Activant Eagle* Bill of Materials for Windows will be a welcome tool for your business.

## BENEFITS

- Create one standard bill of materials—rather than dozens— then customize the order at POS
- Meet target margins with flexible pricing methods
- Print shop orders from point-of-sale/order entry to ensure accuracy and complete orders

Save time and improve accuracy at checkout by building template bills of materials.

## KEY BENEFITS OF BILL OF MATERIALS FOR WINDOWS

### Flexible pricing lets you offer anything from kit discounts to sum-of-the parts pricing

- Flexible pricing methods include:
  - Set price
  - Cost plus a percentage
  - Mark-up by a certain amount
  - Sum of the components
  - Discount off total price

### Customize orders easily to deliver complete, accurate orders the first time

- Add components at point-of-sale
- Component items include regular items, kit groups, bill of materials groups and comments
- Group like components into drop-down lists with default selections
- Modify bill of materials configurations for sales at point-of-sale
- Post bill of materials groups to sales, order, special orders and estimate transaction types
- Modify bill of materials configuration on existing orders

### Print complete order details, including instructions for the shop, as necessary

- Set up shop order printer by terminal
- Print shop order for bill of materials items from point-of-sale orders
- Print setup options include:
  - Print on order/invoice only
  - Print on shop order only
  - Print on both
  - Don't print
