

HIGH-SPEED CREDIT CARD AUTHORIZATION

EXPEDITE CREDIT CARD TRANSACTIONS AT POS, WHILE ELIMINATING DOUBLE ENTRY AND PREVENTING LOSS

High-Speed Credit Card Authorization for the Activant Eagle® system is the solution when your business demands an efficient, integrated and speedy credit card processing solution at your point-of-sale checkout counter. Internet-based high-speed credit card authorization is provided by ProtoBase, a third-party software package that can be fully integrated with your Eagle server and Point-of-Sale system to handle credit card transaction authorization.

Efficiency at the checkout counter is important to your customers. Because ProtoBase is integrated right into your Eagle system, there is no need for your sales staff to double-enter transaction data into a separate credit card authorization system. Each time a transaction is authorized in your store, it is batched with other transactions so you initiate settlement only once for *all* your POS stations. With internet-based high-speed credit card processing, you experience rapid credit authorization times, resulting in faster checkout lines and happier customers. Internet connectivity is more reliable than dial-up, thereby reducing the risk of disruption to your business.

You can even accept purchase cards for your business-to-business transactions. With Level II data capture, your customers get the tracking information they need and you qualify your transactions for the best rates possible, saving you money with each purchase card sale.*

In the back office, High-Speed Credit Card Authorization delivers reconciliation and accountability in a single, easy-to-use package. You will be able to view credit card activity and print consolidated reports from any terminal. With the superior reporting features, reconciliation of credit card batches against your standard Eagle end-of-day reporting is a breeze.

BENEFITS

- Reduces credit authorization times to a few seconds
- Speeds the checkout process by eliminating double entry at point-of-sale
- Saves time by creating a single batch of credit card transactions so you perform only one settlement
- Captures and transmits Level II Purchase Card data so you qualify for the best rates possible

KEY BENEFITS OF HIGH-SPEED CREDIT CARD AUTHORIZATION

Faster, more accurate transaction and purchase card processing saves you money and speeds checkout

- Authorizes credit transactions through high-performance Internet connection
- Supports multiple-transaction processing, eliminating the need to wait for one transaction to complete before submitting another
- Secure VPN connection between your Eagle and the ProtoBase servers ensure that the consumer's credit card information is safe as it travels over the Internet
- Automatically prompts salesperson to authorize every credit card transaction, which reduces your losses due to fraud or credit card theft
- Fully supports multiple tenders to include credit cards and other tender types on single transaction
- Logs and reports transactions by store, date, time and salesperson
- Captures and transmits Level II Purchase Card data
- Speeds up the checkout process and reduces data entry errors by eliminating the need to double-enter transactions into a separate credit card authorization system

Consolidated tasks help you administer the program easily from any terminal

- Administer the entire credit card authorization system from any terminal in any store
- Consolidates reporting across all terminals in each store
- Consolidates all credit card transactions for each store into a single batch for reporting and settlement, which eliminates the need to perform separate settlements for each point-of-sale station
- Compatible with both Activant Eagle POS for Windows and Quotes & Bids for Windows, as well as existing POS and CPOS applications running on PCs, Sierra Stations, FDTs and VDTs

Efficient archiving keeps transaction details at your fingertips

- Archives all credit card transactions in a searchable database
- Credit card detail can be recalled and reprinted from the transaction archives

ProtoBase is dependable during peak periods and grows with your business

- Scalable to fit your present and future business needs
- Robust and dependable even during your peak transaction volume periods
- Supports the nation's most popular credit card processing networks**
- Highly reliable with fewer downtime occurrences and reduced re-submit attempts
- Easily revert to dial-up during rare downtimes, resulting in minimal disruptions

“Our customers are busy these days. With ProtoBase Credit Card Authorization, credit cards are approved faster, corrections are easier and settlement is a breeze. It's simple and our customers are through point-of-sale quickly and accurately.”
