

EAGLE MOBILE

CREATE TIME WITH INVENTORY MANAGEMENT, RECEIVING AND PHYSICAL INVENTORY

Does a price check, inventory check or receiving have you running in circles? Rather than run between your workstation, store aisles, checkout counter, loading dock and storage room performing these tasks, you want to create more time to help your customers and build a loyal customer base. Yet we often get caught doing the same old thing because “that is the way we have always done it.” Interested in the chance to create more time and improve customer service? Eagle Mobile is that chance!

Eagle Mobile is the Next Generation Mobile Platform for Activant Eagle®. With an easy-to-use graphical user interface, the new Eagle Mobile provides the core inventory management, receiving and physical inventory features you rely on in Eagle®. You can also run multiple applications simultaneously without losing your data, such as performing a price check for a customer while doing physical inventory counts. The main applications in Eagle Mobile are Inventory Management, Location Management, Receiving by PO, Receiving by Item, Item Lists, Label Printing and Physical Inventory. New add-on applications for Purchasing, POS, Mobile Manager/Analytics and Customer Relationship Management will be available in future releases.

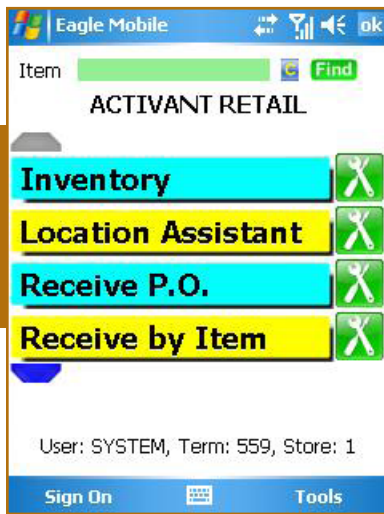

Eagle Mobile creates more time by allowing you to receive inventory, add UPC codes and print new labels to quickly add items to your shelves while at the receiving dock. This can all be accomplished without having to return to the workstation, which ultimately allows for quicker restocking and fewer empty shelves.

Customer service can also be improved by providing on-the-spot information for customers on specific items. Eliminating the need to go back to the checkout counter or workstation, Eagle Mobile can quickly check list price, loyalty price, quantity on hand (QOH), quantity on order (QOO) and when the next order is arriving on any item in real time.

With Eagle Mobile creating more time for you and your employees, your business can focus on what is important – your customers.

BENEFITS

- Provide list and loyalty pricing and inventory checks for a customer in the aisle
- Quickly change locations of multiple scanned items
- Receive items at the dock, print labels and immediately put them on the shelf without going to a workstation
- Scan multiple items in shelf order to print out labels in shelf order
- Check item sales by month, last 12 months or last year from anywhere in the store

Quickly get to crucial inventory information you need to manage your business.

KEY BENEFITS OF EAGLE MOBILE

Achieve More Management on the Floor

- Check last sale date and sales history by month, YTD, last 12 months or last year
- Check QOH, QOO and arrival for the next order
- Change retail price or replacement costs and write directly to the master inventory file

Receive New Inventory and Shelf it Immediately

- Match items directly to purchase orders at the dock
- Add and link new UPC to items at receiving
- Print labels immediately for new items

Provide Faster Customer Service

- Provide quick price checks for customers in the aisle
- Tell customers when their item will be arriving
- Find multiple locations of items that customers are looking for

Quickly Reprint Labels for an Entire Location

- Quickly scan an entire location in order and print out new labels in the same order
- Print labels on the fly with a portable printer
- Print to a laser printer with your own custom format

Eliminate Shut-Down Days for Inventory

- Take physical inventory or cycle counts at any time without closing your store
- Reduce mistakes from transferring pen and paper counting methods
- Work from real-time inventory data and not out-of-date data, while eliminating the need for uploading/downloading data

Requirements:

- Eagle Linux Server with Level 18.1 or higher
- Mobile computers certified by Activant for Eagle Mobile
